Horizon 2020 programme

**Science with and for society
SwafS
462 M€ 2014-2020**

Why can I be interested in SwafS programme?

- 1
 - SwafS welcomes new actors, as established in the Work Programme 2018-2020 (page 10): “developing new partnership will be a priority”.
 - All kind of stakeholders welcome, strong emphasis of consortia with a “quadruple helix” approach.
- 2 Spain is number 1 in attraction of funding (15% of total funding, last results 2015 call)

What is in SwafS programme for me?

- Opportunities for the private sector in all topics, and specific opportunities for companies to take the lead at certain areas...
- ... for those interested in interacting with citizens and complying with the highest standards.

1. Introduction to the SwafS programme

At the H2020 Specific Programme:

"Science with and for society" should build effective cooperation between science and society, foster the recruitment of new talent for science, and pair scientific excellence with social awareness and responsibility.

2. Responsible Research and Innovation (RRI)

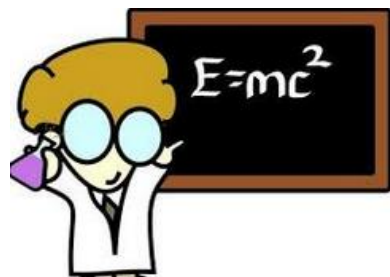

- A process for **better aligning research and innovation** with the **values, needs and expectations of society**
- Implying particularly close cooperation between all stakeholders in the following: **science education**, **public engagement**, **access to research results** and the application of new knowledge in full compliance with **gender** and **ethics** considerations (Competitiveness Council on 4-5 December 2014).
